I wish it could have been more engaging but it was dry material.'		4	5	4	3	5	5	I think the instructor did a good job trying to engage the class into a dense and dry topic. Students were quite unengaged during class which created a difficult class to teach. I commend the professor for making this class as interesting as possible.'	2	2	2	2	2	2

I did not read the material as much as needed so in that sense I did not work to my potential but in regards to assignments and in class I believe I worked to my potential.	5	3	4	5	Strengths of the course were the class discussions and examples and the emphasis on the learning of the subject rather than the grades. The powerpoints did get boring but for this area of study and for this class it is hard to make this class non-lecture.'	5	5	5	5	5	5	5	I very much enjoyed this professor. . The subject matter is not exciting but it is very valuable to sociology and research and I think he did a great job. He always made class enjoyable to come to and he was very lively and funny in a class where you would not really expect that. His availability and flexibility outside of class was excellent and he made me feel a part of the class and that he cared.'	1	1	1	1	1	1

I made sure I understood the material before I went to class so I could actively participate and follow along. I did not always read the complete chapter we were suppose to before class however.	4		4	3	4	4	Alot of this material is not the most interesting stuff to teach but I thought the professor did a good job of trying to meet our needs at students and keeping us engaged. We practiced alot of things we learned and put it to use in our own research. I thought it was good to be able to practice what we were learning. I think for future classes not having so much lecture and straight copying of notes would be better and more engaging.	4		4	5	4	4	4	4	4	He did a good job at making boring material somewhat interesting and keeping the class engaged. He gave good feedback and walked us through the steps of how to do research. I think giving us more real examples of research and what others have done would have been beneficial.	4		2	1	1	1	1	1	2

If I had a question I made sure to email the professor.	4	2	3	3	This course was very straightforward and I always knew what to expect from it. The power points were easy to follow and accessible online which was very beneficial. They also were helpful in that they had review questions. This class was not discussion based and for the topic being examined I feel that it was taught very well.	4	5	3	4	5	4	This was a well taught class. However on some assignments that were a large portion of my grade were easily graded sometimes making the class seem easier then it actually was. The instructor was engaging and did his best to make a not very interesting class fun to attend.	1	1	2	1	1	2

I feel that I worked to my potential.	5	3	4	5	The strengths of this course were the readings and examples given in lecture about the content because there was so much information that was covered per chapter. I think the assignments were beneficial in helping me understand the material.	5	5	5	5	5	5	5	I feel that the instructor improved throughout the semester. After a first exam he had us review the course and took our critiques into consideration and added them in to the course. Overall he was very effective in teaching this course.	1	1	1	2	1	1

I worked hard on certain assignments but the lower point assigns I really had no work potential. Finally I felt like I was actively learning in the class and made it my class time to participate.	4	3	4	5	The strengths of this course in my opinion were creative work case studies and the energy level. Firstly the work was creative because we could do it in our own way and not the way of the professor wanted. Case studies were important because they were plentiful and insightful. The energy level was brought by the professor and kept the class interesting. An improvement for the class is just having time to get used to teaching this class.'	5	5	5	5	5	4	The professor had plenty of energy and taught the class well. It was hard to understand him because of his country of origin and I feel like this should not reflect his teaching ability. '	2	2	2	1	1	1

I did not always read the chapters as thoroughly as I should but I never felt unprepared for class. It was hard to engage sometimes during lectures because some of the material was dry but that was is bound to happen in a research methods course.	4	4	4	4	I did not enjoy the reading but again I wasn't expecting a thrilling read when signing up for the course. The lectures were decent. The material wasn't always extremely engaging but the prof added enough personality that it wasn't a complete bore. I appreciated all of the projects that we did and I felt that they really helped me to understand what we were learning about in class.	5	5	4	4	5	4	I enjoyed the professor for this course. I think he has a great knowledge on the subject. He kept classes entertaining while still teaching us what we needed to learn.	1	1	1	1	2	1

It did not reflect my interest or anything that I will need for my future career in the subject. It was extremely difficult for me to grasp the information in class and the types of research we were required to do.	4	1	5	3	It is great for the sociology students doing research in their field but not for the students who do not plan to ever utilize research within this major. Things in class and the daily lessons were fine. Homework was fine difficult and tedious at times.	5	4	4	5	5	5	I enjoy his humor. He is very good about getting across the deep information and subject matter. He could be more organized at times and a little more clear about things. Do not critique students in class in front of everyone.	1	1	3	3	2	2
